BLOCKCHAIN

GOAL

From **3/21/2018 - 4/10/2018**, a team of founders from Silicon Valley will meet in Shenzhen & Beijing to participate in knowledge sharing and business collaboration between the US & China.
We call our community "Imagined in America, Made in China". It is a cross-border network of founders & investors. Among them are engineers, entrepreneurs and venture capitalists. Our goal is to build companies of lasting values and impact.

Zi & Li will lead a group of Blockchain & AI founders to discuss their technology & business plan. We are seeking investors and partners.

3月21号-4月10号，硅谷的创始人将在深圳和北京，建立中美之间的知识共享和业务合作。

我们的团体定义"美国创想，中国制造"。是创始人和投资者的跨境网络。其中有工程师，企业家和风险投资家。我们的目标是建立有意义和成功的企业。

Zi＆Li将带领一批Blockchain和AI创始人讨论他们的技术和商业计划。我们在寻求合作伙伴和投资者。

WHO

Zi Wang

As an entrepreneur and tech futurist, Zi is passionate about creative design & future of computing.

Prior to founding his startup companies, Zi was a Creative Director at Google, leading some of the most successful products [Android, Chrome]. He was the first Global Creative Director for the Google hardware team and co-founded Google ACME Research Lab, a $20M lab funded by Larry Page to work on AI projects.

Zi has spent the past 2 years leading an AI startup to work with Corning, Google, and Toyota to develop next-generation AI products. Expect some of these R&D products to ship in the 2nd half of 2018. Zi is an active member of Stanford University's CodeX Blockchain group; our mission is to bring together researchers, lawyers, entrepreneurs, and technologists to advance Blockchain.

Our vision is to be earth's most helpful real estate company. At Third Planet, our business is to create & protect values for the global real estate ecosystem: developers, investors and owners. We are on a mission to create new sales channels for developers, increase investor liquidity, and most importantly, we want to help millions of people to have a better way of living.

Stephen Tse

Stephen has been obsessed with protocols and compilers since high school. He reverse-engineered ICQ and X11 protocols, coded in OCaml for 15+ years, and graduated with a doctoral degree from the University of Pennsylvania on security protocols and compiler verification.

Stephen was a researcher at Microsoft, a senior infrastructure engineer at Google, and a principal engineer on search ranking at Apple. He founded the mobile search Spotsetter, a startup acquired by Apple.

Stephen hosts a weekly gathering, TGI-$, Machine Learning and Blockchain over Drinks with Ex-Googler founders.

Currently, Stephen is working on Harmony Protocol to scale blockchain to 10M tx/sec and 100-millisecond latency. Harmony will bring 1,000x speed and capacity to the next generation of the decentralized economy, enabling marketplaces for 10B people and 100B devices.

thirdplanet.io

simple-rules.com

March 2018, Third Planet signed a major real estate deal with one of the largest developers in China/US. In the next 90 days, our platform will securitize a $60M San Francisco property and

The global real estate market is worth $217 trillion.

The total value of U.S. homes is $32 trillion.

Homes in the California and New York are worth $5.3 trillion. The size of the U.K. and French economies is worth $5.2 trillion.

Ming Li

Ming is a software generalist who has successfully built and shipped numerous products including IoT platforms, Ads systems, social networks, network devices, and telecom systems. He completed engineering degrees from Carnegie Mellon University and Wuhan University.

Ming was a founding engineer at Technicolor Beijing, a senior infrastructure engineer at Google, and most recently a manager at Nauto. He helped Technicolor to grow from 4 to 600 engineers in four years. He built sophisticated infrastructure at Google to operate billions of dollars ads business. At Nauto, a vehicle data platform startup with $180M VC funding, he led the machine learning infrastructure engineering efforts.

Currently, Ming is building the technology platform of Third Planet, an innovative blockchain real estate company. Our mission is to create & protect values for the global real estate ecosystem.

Li Jiang

Studied Economics at Northwestern University; co-founded student-run business in college; investment banking and capital markets work at Goldman, Morgan Stanley, William Blair.

Past 5 years in Silicon Valley as VC at GSV and angel investor; executive producer of startup documentary on Youtube with over 1.4 million views; Li is a co-owner of professional ultimate frisbee team in Bay Area.

Hoi Yeung

Hoi has been programming since age 12, and he is passionate about building technology to improve the world. Hoi graduated from Imperial College London with a Computer Science degree.

Hoi worked at Bloomberg, designed and launched Fix Income Dynamic Analysis function. Hoi is also devoting to bridging the entrepreneur communities from Silicon Valley to the market opportunities and resource in China.

He co-founded a startup focusing on solving information asymmetry for the global crypto market. pGrab's vision is to build an ecosystem of products and services to help safeguard investor interests, promote efficient market and facilitate capital formation. pGrab aims to protect and promote the future growth of the blockchain industry.

Hochung Nam - Third Planet Co/Founder

Karel Luwena - Aerospace Engineer

Hourann Bosci - Ex-Google, Harmony engineer

Bjorn Stabell - App Annie Co-Founder
